SOUND DEADENER

OEM COATING: AIR DRY

SERIES B983 – LOW VISCOSITY DESIGN

ELASTOMERIC THERMAL AND ACOUSTICAL BARRIER

DESCRIPTION

Sound Deadener provides an acoustical barrier when applied alone over various substrates. Typically the product is applied by airless spray.

OUTSTANDING FEATURES/BENEFITS

- Low VOC
- Easy to apply & Easy to clean up
- Single component
- High temperature stability
- Chemically resistant
- Waterborne
- Low temperature flexibility

TYPICAL USES

Sound Deadener acts as a thermal and acoustical barrier in various vehicle cab or firewall applications when used in conjunction with resin bonded fiberglass.

NOTICE

Before using this product, read all warnings, limitations and safety information printed on the product label, Safety Data Sheet (MSDS), and Technical Data Sheet.

LIMITATIONS

- KEEP FROM FREEZING.
- STORE BELOW 90°F.

ADDITIONAL VARIATIONS AVAILABLE

 Higher viscosity design (B982) (160 – 180 KU's @ 77°F, Stormer Viscometer

Please ask a Sandstrom representative for technical assistance and/or details.

А	COMPOSITION AND	PHYSICAL PROPERT	
Net Weight per gallon	13.48 lbs. (Theoretical)	Vehicle	Acrylic
Weight Solids	68% ± 1%	Lubricating Pigment	None
Volume Solids	48.86% (Theoretical)	Color Black, Neutral Base, Black Colorant fo Neutral Base, Aluminum Concentrate for Neutral Base	
VOC	0.0345 lbs./gallon	Color Stability Not for exterior exposure use	
Odor	Slight Ammonia	Finish Matte	
Mix Ratio	N/A: B983-B01 is ready for use	Gloss	N/A
Viscosity ASTM D562	100 – 110 KU's @ 77°F Stormer Viscometer	Cleanup Water	
Shelf Life	9 months from date of manufacture	Thinner	Use as supplied
Storage Conditions	50°F – 90°F)°F Drying Time: @77°F ± 5°F and ≤ 70 humidity; adequate ve	
Freeze/Thaw Stability	Must be maintained above 40°F	Tack Free	2-3 hours @ 30 mils dry
Flash Point	>205°F	Dry Hard	6-8 hours @ 30 mils dry
Coverage Rate*	27 sq. ft./gal @ 30 mils dry	Complete Cure	1 week
Recommended Coats	1	Force Cure:	Not advised
Dry Film Thickness	30 mils		
*Actual figures do not inc	lude spray loss. Also allow for surface irr	egularities and porosity, as v	well as material loss when mixing.

IMPORTANT NOTICE TO BUYER / WARRANTY AND LIMITATIONS ON OUR LIABILITY

IMPORIANT NOTICE TO BUYER / WARRANTY AND LIMITATIONS ON OUR LIABILITY We warrant our products to be free of manufacturing defects and that they meet our current published physical properties and specifications. All information and suggestions presented are rendered gratis and are accurate to the best of our knowledge. They are based on technical data we believe to be reliable and are intended for use by persons having skill and "know-how" at their own discretion and risk. Prior to use, customers are cautioned to determine the suitability of our products for any given application through their own testing. NO WARRANTY IS MADE, EXPRESS OR IMPLIED, REGARDING SUCH INFORMATION, THE DATA ON WHICH IT IS BASED OR THE RESULTS OSTAINED FROM ITS USE OR THAT OUR PRODUCT SHALL BE MERCHANTABLE OR FIT FOR ANY PARTICULAR PURPOSE. SUCH STATEMENTS ARE NOT DI SUGGEST INFRINGEMENT OF ANY PATENT. Since conditions of use of our products are beyond our control, all suggestions and statements are made without guarantee, warranty or other responsibility, express or implied, on our part. We assume no responsibility for results obtained, or damages incurred, from their use beyond replacing material proved to be defective or refunding the purchase price of such material at our option. Acceptance of delivery of our product means you have accepted the terms of this warranty, whether or not purchase orders of other documents state terms that vary from this warning. No seller is authorized to make any representations or warranty or assume any other liability on our behalf with any sales of our products. SANDSTROM PRODUCTS COMPANY

PERFORMANCE AND FUNCTIONAL PROPERTIES				
All listed properties represent the B983-B01 Black, Low Viscosity design.				
Breaking / Tensile Strength	<i>Method:</i> Required: Pass:	ASTM D751, Grab Method Coating strength 10.5 kN/m 11 kN/m		
Chemical / Fluid Resistance	<i>Method:</i> Required: Pass:	Wipe or spot test specimen on coated surfaces at room temperature with typical chemical (e.g., gasoline, diesel fuel, hydraulic fluid, grease). Examine at time of application and after 24 hours. No evidence of tackiness of coating. Some swelling on spot tests, but no evidence of tackiness or breakdown of coating.		
Corrosion Protection	Method:ASTM B117Required:500 hours, No change in original properties.Pass:500 hours, No cracking or deterioration of coated surfaces.			
Flexibility	Method A: Method B: Required: Pass:	degrees over a 2" diameter mandrel with coated side out. lethod B: Condition specimen for 1 hour @ 450°F. After cooling, bend over 1/8" mandrel. equired: A and B, Coating shall remain flexible and show no evidence of breaks on surface.		
Puncture Resistance	<i>Method:</i> Required: Pass:	0.75" diameter ball to compress coated side of sample to 0.63". Required: Shall show no visible breaking of the coated surface.		
Tearing Strength	<i>Method:</i> Required: Pass:	ASTM D751, Tongue Method Coating strength 4.45 N minimum 4.7 N		
Temperature Resistance	<i>Method:</i> Required: Pass:	Place 10×10 cm test specimen coated surface in contact with a typical aluminum or steel panel, expose to $245^{\circ}F - 255^{\circ}F$ for 3 hours. Cool and separate specimen from test panel. Shows no evidence of fusing of the surface coating to panel. No fusing of coating to panel.		

COVERAGE

One gallon of B983 Low Viscosity Sounds Deadener will cover approximately 27 sq. ft. with 30 mils dry film thickness. Coverage depends on method of application and other variables such as type of surface to be coated. Above coverage rates are based on 100% efficiency.

SURFACE PREPARATION

Surfaces must be clean, dry, and free of all dirt, grease, wax, loose or peeling paint, oil and other contaminants. Contaminated surfaces do not provide a suitable substrate for proper coating adhesion resulting in reduced performance.

IMPORTANT! DO NOT TOUCH CLEAN SURFACE WITH FINGERS - OIL FROM THE HANDS WILL INTERFERE WITH PROPER COATING ADHESION.

STIRRING

IMPORTANT! THIS COATING SHOULD BE STIRRED THOROUGHLY BEFORE USE AND PERIODICALLY DURING APPLICATION.

THINNING

Use coating as supplied.

APPLICATION

Sound Deadener is typically applied by airless spray.

DRYING

Allow coated parts to air dry at 77°F ±5°F and < 70% relative humidity, @ 30 mils dry film thickness:

> Tack free..... 2-3 hours Dry hard 6-8 hours Complete cure 1 week

CLEANUP

Use water immediately.
