DESCRIPTION

Sandstrom Piston Skirt Coating is a heat curing solid film lubricant for use in piston skirt applications. This coating provides very low friction and extremely low wear against conventional cylinder bore surfaces honed to a standard 10 - 20 microinch surface finish. It is also suitable for applications requiring extremely low wear and corrosion resistance against most surfaces involving boundary lubrication conditions such as oil pump wear surfaces, cylinder bore surfaces etc.

OUTSTANDING FEATURES/BENEFIT

- Very low frictional characteristics
- Excellent corrosion resistant over both aluminum and castiron substrates
- Long wear life

PACKAGING: One gallon cans, One Quart Cans

SURFACE PREPARATION

CAST IRON Use Acetone to thoroughly degrease surfaces to be coated. Surface etching is recommended. **ALUMINUM** Clean with a mild alkaline, silicate free, low etching cleaner to remove oils and oxide film. Pretreat using a chrome free chemical conversion phosphate coating. Seal with a chrome free sealer.

APPLICATION

Apply E724 Piston Skirt Coating as supplied by screen method. If necessary, reduce sparingly with thinner blend listed below. Temperature of product at time of coating should be 77F +/- 5F. Follow bake schedule listed below.
