

POXYLUBE® 303

HIGH PERFORMANCE URETHANE COATING SERIES R303

TWO-COMPONENT, WATER REDUCIBLE

DESCRIPTION

POXYLUBE® 303 is a high performance, two-component, water reducible urethane.

OUTSTANDING FEATURES/BENEFITS

- · Unsurpassed durability
- · Excellent hardness and mar resistance
- · Outstanding adhesion to a wide variety of surfaces
- · Cured film is water repellent

TYPICAL USES

 Steel surfaces that require a long lasting, attractive, and mar resistant finish.

NOTICE

Before using this product, read all warnings, limitations and safety information printed on the product label, Safety Data Sheet and Technical Data Sheet. The properties listed on this sheet are not intended for use as a specification. Please contact our Technical Service Team.

Refer to our website for answers to common questions:
https://www.sandstromproducts.com/resources/FAQs/

LIMITATIONS

- There is a 3 hour pot life (at 77°F) after mixing. Using material past the 3 hour mark will result in a loss of hardness.
- Poxylube® #303 is formulated for spray application only.

COMPOSITION AND PHYSICAL PROPERTIES							
Net Weight per gallon [^] (4A + 1B) ASTM D1475	9.75 lbs. ± 050 lbs./gallon	Vehicle	Polyurethane				
Weight Solids (A+B)	50% ± 2% (Theoretical)	Lubricating Pigment	PTFE				
Volume Solids (A+B)	40% ± 2% (Theoretical)	Color	Black, White and Custom Colors upon request.				
voc	3.00 ± 0.05 lbs./gallon (360 \pm 6g/L) (Theoretical)	Color Stability	Not for exterior use				
Odor	Mild Solvent	Finish	Varies by color				
Mix Ratio	4 parts A to 1 part B (by volume)	Gloss^ ASTMD523	<10.0 gloss units @ 60°				
pH	NA	Induction Period	None required				
Viscosity (A+B)	Varies by color	Pot Life	3 hours @ 77°F (see Limitations)				
Shelf Life	Part A 12 Months from Date of Manufacture Part B 6 Months from Date of Manufacture	Coverage Rate*	650 sq. ft./gallon @ 1.0 mil DFT				
Storage Conditions	40°F to 80°F	Recommended Coats	1				
Freeze/Thaw Stability	DO NOT FREEZE	Dry Film Thickness ASTM D7091	0.5 – 1.0 mil				
*Actual figures do not incl	ude spray loss. Also allow for surface irr	regularities and porosity, as w	ell as material loss when mixing.				

*Actual figures do not include spray loss. Also allow for surface irregularities and porosity, as well as material loss when mixing.

Impact Resistance	Direct (Intrusion)	160 inlb.	160 inlb.	140 inlb.			

IMPORTANT NOTICE TO BUYER /WARRANTY AND LIMITATIONS ON OUR LIABILITY
We warrant our products to be free of manufacturing defects and that they meet our current published physical properties and specifications. All information and suggestions presented are rendered gratis and are accurate to the best of our knowledge. They are based on technical data we believe to be reliable and are intended for use by persons having skill and "know-how" at their own discretion and risk. Prior to use, customers are cautioned to determine the suitability of our products for any given application through their own testing, NO WARRANTY IS MADE, EXPRESS OR IMPLIED, REGARDING SUCH INFORMATION, THE DATA ON WHICH IT IS ASEADOR THE RESULTS OBTAINED FROM ITS USE OR THAT OUR PRODUCT SHALL BE MERCHANTABLE OR IT! FOR ANY PATENT. Since conditions of use of our products are beyond our control, all suggestions and statements are made without guarantee, warranty or other responsibility, express or implied, on our products are beyond our control, all suggestions and statements are made without guarantee, warranty or other responsibility, express or implied, on our products are beyond our control, all suggestions and statements are made without guarantee, warranty or other responsibility, express or implied, on our products are beyond our control, all suggestions and statements are made without guarantee, warranty or other responsibility of use of such material at our option. Acceptance of delivery of our product means you have accepted the terms of this warrant, whether or not purchase

ASTM D2794	Reverse (Extrusion)	60 inlb.	140 inlb.	40 inlb.		
^ Property tested with each production batch.						

GENERAL

Poxylube® 303 consists of lubricative pigments dispersed in a room temperature curing resin system thinned with appropriate solvents. For maximum service, the APPLICATION INSTRUCTIONS MUST BE FOLLOWED CLOSELY.

FILM THICKNESS & ENGINEERING TOLERANCE

As supplied, this product will yield a film thickness of about 0.0005 to 0.001 inches per spray application. Usually engineering tolerances will permit necessary minimum film buildup of 0.0005 to 0.001 inches without interference. Whenever possible, the proper tolerances should be designed into the part.

COVERAGE

One gallon of this material will cover 480 - 520 sq. ft. with a dry film thickness of 0.0005 inches. Coverage depends upon methods of application and other variables such as overspray and type of surface to be coated. Above coverage rates are based on 100% efficiency.

SURFACE PREPARATION

Surfaces to be coated must be clean, dry, and free of all dirt, grease, silicones, release agents, wax, loose or peeling paint, oil or other contaminants. Consult Sandstrom Products Company for specific project recommendations.

CLEANUP

Use soap and water.

IMPORTANT! DO NOT TOUCH CLEAN SURFACE WITH FINGERS - OIL FROM THE HANDS WILL INTERFERE WITH PROPER COATING ADHESION. Whenever possible, treat both contact surfaces (i.e., the shaft and the bearing).

STIRRING

While stirring Component A, slowly pour all contents of Component B into Component A (The mix ratio is 4 to 1). Stir until thoroughly mixed. No waiting period is required. AGITATE VERY MILDLY BY HAND DURING USE FOR CONSISTENT SHEEN.

THINNING

No reduction should be needed for spray application. If desired, reduce as needed by volume with a maximum of 10% water.

APPLICATION

POXYLUBE® 303 is formulated for spray application. For conventional air spray use between 40-60 psi. **Do not over apply. Applying over 6 mils wet will cause blistering in the dried film. 3 to 4 mils wet is the optimum for performance.** Adjust gun tip, fluid pressure and air pressure as needed to apply a smooth film.

DRYING TIME

Air dry according to the following @ 70°F, 50% relative humidity and adequate ventilation before putting into service.

Tack free:.....4 hours Hard cure:.....12 hours Complete cure:.....7 days

DANGER! USE WITH ADEQUATE VENTILATION.

WARNING: OPERATOR SHOULD WEAR MESA/NIOSH APPROVED RESPIRATOR SUITABLE FOR AN ISOCYANATE/ORGANIC VAPOR ENVIRONMENT.
